

Homework Classical Physics, Fall 2023

Prof. J. Fritz, Research III Room 56, jfritz@constructor.university.de

Problem Set 03.3 (L05 & L06)

Due on Thursday, 28. September 2023, at 09:30 (in the morning!)

(= Deadline for submitting a pdf file with solution)

Mechanics - Spring force (4 points)

A mass $M = 2m$ hangs at a spring with spring constant k . Another mass m hangs at a string which is attached to the first mass. The system shown is at rest. What will be the acceleration of the mass M and m just after the string is cut between the two masses.

The string is massless and inextensible, the spring is massless.
