

Homework Classical Physics, Fall 2023

Prof. J. Fritz, Research III Room 56, jfritz@constructor.university.de

Problem Set 04.4 (L07 & L08)

Due on Thursday, 5. October 2023, at 09:30 (in the morning!)
(= Deadline for submitting a pdf file with solution)

Mechanics - Rotational motion and energy (4 points)

A pointmass starts to slide down from the highest point of a sphere with radius R . At which height h does the pointmass detach from the surface of the sphere?

Note: What is its velocity at a certain height? What are the conditions for detaching from the surface?
